1. Claims 10, 20-29, 31, 32 and 34-39 are allowed over the cited prior art.
2. The following is an examiner's statement of reasons for allowance: None of the prior art of record disclose or teach a power delivery system;

Claim 10, a power control circuit operable to control the power conditioning circuit such that input power tracks with output power, and the power output signal indicative of output power is obtained based on direct measurements of speed and torque of a motor coupled to the power inverter.

Claim 20, a first sensor unit operative to provide a signal indicative of the DC power drawn by the power conditioning unit by sensing a voltage and current at the output of the rectification circuit and a second sensor unit operative to provide a signal indicative of output AC power delivered to the load by sensing the DC link voltage and current.

Claim 38, obtaining an indication of input power drawn by the power delivery system from an alternating current power source by sensing a voltage and current at an output of the rectification circuit and obtaining an indication of the output power supplied by the power delivery system by sensing the DC link voltage and current.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
